ABOUT

BSc (Hons) Computer Science & Technology undergraduate specializing in Flutter, Dart, and AI technologies. Experienced in developing scalable cross-platform mobile apps, RESTful API integration, state management, and responsive UI design. Focused on clean architecture, performance optimization, and AI-powered features, with strong problem solving, Git, and agile collaboration skills.

EDUCATION

BSc (Hons) Computer Science & Technology 2022 – 2026 (Expect)
Sabaragamuwa University of Sri Lanka, Belihuloya, Sri Lanka.

Secondary & Higher Education - Other Stream 2020
G/Batemulla National College

EXPERIENCE

Freelance Software Developer 2024 (Present)
Built and published a client app, I'm Done, on Google Play Store. Developed web and mobile applications using Flutter, React.js, Node.js, Spring Boot, Firebase, and REST APIs, delivering responsive solutions to client

Mobile App Developer & Publisher Intern 2026 (Completed)
EonTech Global Group (pvt)Ltd
Developed cross-platform mobile apps using Flutter & Dart, integrated REST APIs and Firebase Authentication, optimized state management for performance, and collaborated using Git and Agile methodologies.

PROJECTS

TeaLink- Mobile Application
A smart tea supply chain management app connecting customers, collectors, and admins with real-time harvest tracking.
Technologies: **Flutter (Dart), Firebase Authentication, Cloud Firestore, Firebase Storage, Google Maps API, VS Code, Git & GitHub, Firebase Console, Android Studio.**

UniGPA - Track Your Grades, Achieve Your Goals.
A student-focused mobile app that helps university students calculate, track, and manage their GPA efficiently.
Technologies: **Flutter (Dart), VS Code, Git & GitHub.**

Expense Tracker - Manage Your Daily Expenses Efficiently
A modern Flutter mobile app that enables users to securely track, manage, and monitor daily expenses. The app supports real-time cloud data storage, receipt image uploads, and provides a clean, user-friendly interface for personal finance management.
Technologies: Flutter (Dart), Firebase Authentication, Cloud Firestore, Cloudinary, Git & GitHub

Sinhala Handwritten OCR System - Web Application
A full-stack OCR system for recognizing handwritten Sinhala text using a hybrid YOLOv8 + CNN model with real-time image capture, preprocessing, and Flask–React based prediction.
Technologies: Python, TensorFlow/Keras, Flask, React.js, OpenCV, YOLOv8, Axios, Git & GitHub

DialBook - Mobile Application
A lightweight contact management app for saving, organizing, and accessing phone contacts efficiently.
Technologies: **Flutter (Dart), Shared Preferences, VS Code, Git & GitHub, Android Studio.**

Undergraduate AI Research Project - AI-Driven Adaptive Animal Deterrent System
Developing an AI-powered wildlife detection and deterrence system using machine learning and computer vision to detect and classify monkeys and pigeons in real time. Training a YOLOv8m model and deploying it on Raspberry Pi 5 using ONNX Runtime. Integrating species-specific acoustic deterrent signals with embedded hardware for automated, real-time environmental response.
Technologies: Python, Machine Learning, OpenCV, TensorFlow/PyTorch, NumPy, Signal Processing

TECHNICAL SKILLS

Programming Language: Python, Java, JavaScript, C, C++, C#
Mobile Development: Flutter, Google Play & App Store Publishing
Web Development: React, HTML, CSS, TailwindCSS
Backend Development: Node.js, Spring Boot, Firebase, REST APIs
Database: MySQL, PostgreSQL, MongoDB, Firebase Firestore
IoT & Embedded Systems: Raspberry Pi, Arduino, Sensors, MQTT, GPIO, IoT Systems
DevOps & Development Tools: Docker, Git, GitHub, GitHub Actions (CI/CD), Postman, VS Code, Linux, Shell Scripting
Design & Collaboration: Figma, Agile Methodology
Software Engineering: OOP, Data Structures & Algorithms (DSA), API Integration

ACHIEVEMENTS

YouthSpark 2025 Winner - Secured People's Choice Award and Most Promising Technology-Based Concept Award at the 2nd International Conference on Applied Sciences (ICAS), Sabaragamuwa University of Sri Lanka for presenting MatchMate LK football management application concept as part of a collaborative team (2025)

PUBLICATIONS

TeaLink Research Paper & Poster Presentation - Presented TeaLink: A Mobile Platform for Digital Tea Harvest Management in Sri Lanka at ICAPS-SUSL 2026, Sabaragamuwa University of Sri Lanka, showcasing a Flutter and cloud-based solution for GPS-verified tea harvest tracking and automated weight verification.

CERTIFICATES

Flutter and Dart: Developing iOS, Android, and Mobile Apps — IBM

Python for Data Science, AI & Development — IBM

Developing AI Applications with Python and Flask— IBM

Getting Started with Git and GitHub — IBM

Machine Learning with Python — IBM
